CORE VALUES

Run for Your Life is a non-partisan artistic manifestation.

This document contains the core values for the project, not the artistic vision. All participants, individuals, employees and partners must agree to the following values in order to be involved in the project.

RUN FOR YOUR LIFE ADDRESSES THE ISSUE OF CLIMATE CHANGE

Run for your life takes the scientists' warnings of runaway climate change seriously. Already large parts of the world are suffering from climate change, with severe drought, extreme floods and violent hurricanes. Primarily, it is the world's poor who suffer.

RUN FOR YOUR LIFE BELIEVES IN A JUST AND VISIONARY TRANSITION

Run for Your Life believes that a radical transformation towards a sustainable and just society, that respects the planet's natural limits, is the only real solution to the climate crisis.

Run for your life sees the climate challenge as a chance to build a better society for present and future generations.

RUN FOR YOUR LIFE IS BASED ON THE IDEA THAT ALL HUMAN BEINGS ARE EQUAL

Run for Your Life tries in all aspects to practice an intersectional analysis on the climate issue. The project actively distances itself from discrimination on the grounds of sex, gender identity or gender expression, ethnicity, religion or other beliefs, disability, sexual orientation, age, cultural identity or socio-economic situation.

Run for your life acknowledges the inequality which is inevitably connected to climate change. The industrialized world accounts for four-fifths of all global greenhouse gases, but it is the developing countries that are, and will be, most affected by climate

change. Run for Your Life believes that it is mainly the responsibility of industrialized countries to reduce their own emissions - both domestic and those that occur beyond one's own borders due to the import and export of goods. These countries must also take responsibility for financing emission reductions, technology transfer and climate adaptation in developing countries. They must also take their share of the responsibility for the growing climate-related migration. Run for Your Life does not support commercial and financial speculation on land, air and water.

RUN FOR YOUR LIFE SUPPORTS LOCAL STRUGGLES AND MARGINALIZED COMMUNITIES

Run for your life acknowledges and respects the countless local movements and organizations that in different ways are fighting against the deterioration of the environment and of living conditions, and are proposing alternative, democratic and sustainable solutions.

Run for Your Life believes that the transformation of our lives and communities can only be achieved through a strong popular movement, which both puts pressure on politicians and ignites the transition itself.

By signing this document you agree to the core values of Run for your life.

You also agree not to communicate anything contrary to these values in the project's name.
